

SECRET

ORD 4627-67
4 August 1967

MEMORANDUM FOR THE RECORD

SUBJECT: Conversation with Major Butcher

1. Major Butcher of Wright-Patterson AFB called today. He informs me that Dr. Totmiller and two other individuals at the Aerospace Medical Laboratory have heard about a computer system which was developed for [] in OEL. It has certain features which they feel would be of value to them in biomedical computations. They heard of this through Mr. Richard Johnson of Systems Research Laboratories, Inc. in Dayton, Ohio. Major Butcher wondered whether Dr. Totmiller and two or three others might visit our facility to see this equipment demonstrated on 6 September 1967. I called [] who was aware of this interest, and he said he had no objections. I called Major Butcher and requested that he provide me with the names of the individuals, their time of arrival, and the specific interest they have from a biomedical viewpoint. He will also certify their security clearances at the secret level. I will then confirm the arrangements with []

2. I suggest that [] and appropriate members from MBSD attend this demonstration which will be in GE 78 H on 6 September 1967. Major Butcher's telephone number is A.C. 513, 257-1110, X 70151 and X 70298.

Deputy Director
of
Research and Development

USAF review(s) completed.
